

circuits. Check to see if the battery is in right. Check to make sure the switch is closed. If it still doesn't work, drop me a line on one of the Maryland or Virginia BBSs and I'll try to help you out.

The sense output: Somehow or other, it is possible to hook something else up to this and activate it by phone (like an alarm, flashing lights, etc.)

158.LSD **by The Jolly Roger**

I think, of all the drugs on the black market today, LSD is the strangest. It is the most recent major drug to come to life in the psychedelic subculture. (Blah blah blah... let's get to the good stuff: How to make it in your kitchen!!)

- 1.Grind up 150 grams of Morning Glory seeds or baby Hawaiian wood rose seeds.
- 2.In 130 cc. of petroleum ether, soak the seeds for two days.
- 3.Filter the solution through a tight screen.
- 4.Throw away the liquid, and allow the seed mush to dry.
- 5.For two days allow the mush to soak in 110 cc. of wood alcohol.
- 6.Filter the solution again, saving the liquid and labeling it "1."
- 7.Resoak the mush in 110 cc. of wood alcohol for two days.
- 8.Filter and throw away the mush.
- 9.Add the liquid from the second soak to the solution labeled "1."
- 10.Pour the liquid into a cookie tray and allow it to evaporate.
- 11.When all of the liquid has evaporated, a yellow gum remains. This should be scraped up and put into capsules.

- 30 grams of Morning Glory seeds = 1 trip
- 15 Hawaiian wood rose seeds = 1 trip

Many companies, such as Northop-King have been coating their seeds with a toxic chemical, which is poison. Order seeds from a wholesaler, as it is much safer and cheaper. Hawaiian wood rose seeds can be ordered directly from:

Chong's Nursery and Flowers
P.O. Box 2154
Honolulu, Hawaii

LSD DOSAGES

The basic dosages of acid vary according to what kind of acid is available and what medium of ingestion is used. Chemically, the potency of LSD-25 is measured in micrograms, or mics. If you're chemically minded or making your own acid, then computing the number of micrograms is very important. Usually between 500 and 800 mics is plenty for an 8 hour trip, depending on the quality of the acid, of course. I have heard of people taking as much as 1,500-2,000 mics. This is not only extremely dangerous, it is extremely wasteful.

LSD comes packaged in many different forms. The most common are listed below:

- 1.The brown spot, or a piece of paper with a dried drop of LSD on it, is always around. Usually one spot equals one trip.
- 2.Capsuled acid is very tricky, as the cap can be almost any color, size, or potency. Always ask what the acid is cut with, as a lot of acid is cut with either speed or strychnine. Also note dosage.
- 3.Small white or colored tablets have been known to contain acid, but, as with capsuled acid, it's impossible to tell potency, without asking.

159.Bananas **by The Jolly Roger**

Believe it or not, bananas do contain a small quantity of *Musa Sapientum bananadine*, which is a mild, short-lasting psychedelic. There are much easier ways of getting high, but the great advantage to this method is that bananas are legal.

- 1.Obtain 15 lbs. of ripe yellow bananas.
- 2.Peel all 15 lbs. and eat the fruit. Save the peels.
- 3.With a sharp knife, scrape off the insides of the peels and save the scraped material.
- 4.Put all of the scraped material in a large pot and add water. Boil for three to four hours until it has attained a solid paste consistency.
- 5.Spread this paste on cookie sheets, and dry in an oven for about 20 minutes to a half hour. This will result in a fine black powder. Makes about one pound of bananadine powder. Usually one will feel the effects of bananadine after smoking three or four cigarettes.

Table of Weights

Pounds	Ounces	Grams	Kilos
1	16	453.6	0.4536
0.0625	1	28.35	0.0283
0.0022	0.0352	1	0.001
